

POLICY

on quality, the environment and health and safety of RF AMPLIFIER-BG EOOD, Shumen

The policy on quality, the environment and health and safety of RF Amplifier-BG EOOD is aimed at continuous improvement of the management system of the organization, with the goal of the most complete satisfaction possible of our clients' requested and anticipated needs during research and development activities, design, construction, production and sale of radiocommunicational and radiolocation products with commercial and defense related applications in conditions of efficient management of environmental aspects.

To ensure this goal, the management of this organization is committing to maintain and continuously improve the efficiency of the system for managing quality, the environment and health and safety at work, to fulfill the requirements of applicable law and other requirements, to fulfill compliance obligations, to prevent and reduce injuries and illnesses of its employees, to prevent environmental pollution, to fulfill the requirements of standards ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018.

To implement this policy, appropriate to the purpose, size and context of the organization, as well as to achieve the goals and programs set, the Management is obligating itself to:

- To manage in a way that, the name of the organization serves as a guarantee to clients for the production of products with guaranteed quality;

- To establish and maintain partnerships with suppliers and engage them in cooperation in the execution of key production processes;

- To inform all employees of the organization about the importance of fulfilling the requirements of the client, to provide them with the necessary training and to create the necessary relationships between all of them for teamwork.

- To provide the necessary resources, which create conditions for manufacturing of products, corresponding to the client's requirements, meeting the relevant regulatory requirements and preventing environmental pollution;

- To provide the necessary conditions for eliminating the hazards and reducing the risks regarding health and safety at work;

- To create conditions for consultation and participation of workers and the workers' representative in solving problems related to health and safety at work.

The Policy on quality, the environment and health and safety is reviewed for relevancy each time during management review. The goals for quality, the environment and health and safety are planned and reported yearly during the management review, and are planned so as to constantly improve and to increase their effectiveness.

As General Manager of RF AMPLIFIER-BG EOOD, I take personal responsibility for fulfilling the made commitments, as well as providing all necessary resources to fulfill the formulated general, specific goals and outlined policy on quality, the environment and health and safety.
